Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1795

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3, 10-12 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the means for contacting/decreasing of claim 1 comprising means for applying a voltage to the nanostructures, does not reasonably provide enablement for any other means for contacting/decreasing. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. (New Rejection)

Applicant has support for the means for contacting/decreasing in the present specification comprising means for applying a voltage to the nanostructures. Applicant has support for no other means for contacting/decreasing and so claim 1 must be amended to recite this means for contacting.

Claims 2-3 and 10-12, dependent on claim 1, fall therewith.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kawanami et al. show utilizing a voltage to change the tension in an electrolyte in a display element of interest while Kroupenkine et al. disclose applying a voltage to nanostructures to cause electrolyte to penetrate to a surface of an electrode.
